31. A system as in claim 30 which includes an output device coupled to the building circuitry for presenting the works on the play list to the output device.

32. A system as in claim 31 which includes a device for storage of digital representations of a plurality of works.

33. A system as in claim 32 which includes circuitry for presenting the works on a selected, edited list to one of an audio output device or a video output device.

34. A system as in claim 33 wherein the circuitry includes a programmable processor.

35. A system as in claim 32 which includes instructions for conducting analysis of the characteristics of works on a selected list.

36. A system as in claim 35 which includes executable instructions for sorting works in accordance with a pre-selected parameter.

37. A system as in claim 36 which includes instructions to present works, sorted in accordance with the pre-selected parameter, to the output device.

38. A system as in claim 32 which includes instructions establishing information pertaining to at least one of invoicing, royalty paying, demand analysis, or, popularity of selected works.

39. A system as in claim 32 which includes instructions to download a work on a selected play list wherein the work is not available locally.

40. A system for creating a list of selected titles comprising:
a source of works which may include, at least in part, an audio component;
a visual output device;
circuitry, coupled to the source and the output device, for building an inventory list of works and for creating a displayable list of works of at least some of the inventory on the output device wherein the circuitry includes instructions for selecting works in accordance with a selected characteristic, and, for executing a plurality of such selected works.

41. A system as in claim 40 which includes executable instructions for selecting works in accordance with one of a selected audio characteristic; a selected video characteristic, or, a selected popularity indicium.

Sect 22

42. A system as in claim 41 which includes circuitry for editing a selected list.
43. A system as in claim 42 which includes instructions for displaying at least part of the inventory list simultaneously with displaying at least part of the edited list.
44. A system as in claim 43 which includes instructions for downloading a work not locally available.
45. A system as in claim 43 which includes instructions for presenting downloaded advertisements.
46. A system as in claim 43 which includes instructions for establishing at least one of royalty payments, or, billing information.
47. A system as in claim 46 which includes instructions for downloading a work not locally available.
48. A system comprising:
executable instructions for accessing at least one source of works;
executable instructions for creating at least one play list; and
executable instructions for executing the play list and for maintaining information pertaining to royalty payments.
49. A system as in claim 48 which includes additional instructions for maintaining information as to popularity of various works.
50. A system as in claim 48 which includes instructions for presenting advertisements.
51. A system as in claim 48 which includes executable instructions for maintaining the source, at least in part, locally.
52. A system as in claim 48 which includes executable instructions for obtaining, from a remote source, selected works not locally available.
53. A system as in claim 52 which includes executable instructions for visually presenting at least one play list.
54. A system as in claim 53 which includes executable instructions for simultaneously displaying at least part of an inventory of works and at least part of a selected play list.

55. A system as in claim 53 which includes instructions for creating and storing a plurality of different play lists.

56. A system as in claim 48 which includes executable instructions for selecting a plurality of works in accordance with a predetermined performance parameter.

57. A system as in claim 56 wherein the executable instructions select works in accordance with pre-specified beats per time interval.

58. A system comprising:
executable instructions for accessing at least one source of works;
executable instructions for creating at least one play list;
executable instructions for executing the play list and for maintaining popularity information pertaining to works from at least one executed play list.

59. A system as in claim 58 which includes instructions for obtaining works not available locally for at least one play list.

60. A system as in claim 58 which includes executable instructions for presenting advertisements.

61. A system as in claim 58 which includes executable instructions whereby works are selected in accordance with a pre-established criterion.

62. A system as in claim 61 wherein the criterion corresponds to beats per unit time and the executable instructions select works in accordance therewith.

63. A system comprising:
executable instructions for accessing at least one source of works;
executable instructions for creating at least one play list;
executable instructions for executing the play list and for displaying advertisements.

64. A system as in claim 63 which includes instructions for selecting works in accordance with a predetermined criterion.

65. A system as in claim 64 wherein the criterion corresponds to beats per unit time and the executable instructions select works in accordance therewith.
